

Programme

Friday 25th June 2010

Morning Session:

Why lasers and why now? The philosophy behind lasers and how do they interact with other high tech equipment in today's modern dental practice.

Laser physics and safety. Preparation for the Queensland University Laser Safety Examination. A must do exam for all Queensland and WA dentists before they use lasers and recommended for all other Australian and New Zealand Dentists.

Afternoon Session:

Soft Tissue lasers vs soft and hard tissue lasers. What are the major differences and relevant applications

Laser clinical applications and settings. Clinical presentation on different procedures done with different lasers; Restorative, Lesion tracking, Periodontal and Surgical applications.

Hands on training on extracted teeth and soft tissue like materials.

Queensland University Laser Safety Certification Exam (Extra Fee of AUD \$550 to sit)

Saturday 26th June 2010

Morning Session:

Laser settings for different clinical procedures.

Live laser procedures on patients performed by Dr Hisham.

Afternoon Session:

Advanced surgical, Cosmetic and Implant Laser Applications.

The future of laser and high tech dentistry, where is it all going.

Questions and Answers (although this is an open learning course and we can address these as they arise)

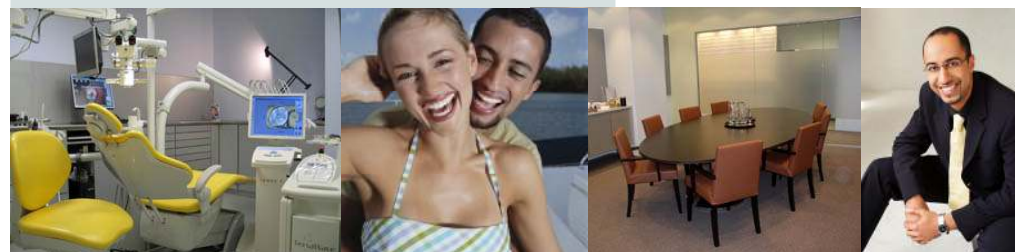

Hands-on
Segment – not
on live patients

Back by popular demand . . .
An action packed two day
advanced course with

Dr Hisham Abdalla
MD DDS MSc NZDREX

Friday 25th & Saturday 26th June 2010

LLCI Laser Applications in Clinical Dentistry -Level 1 & 2

This is an in-depth course on lasers in dentistry with hands-on and live patient surgery. The special focus is on surgical and periodontal applications of lasers. At the end of the course you will be ready to take the Queensland University Laser Safety Certification Examination by Prof Laurie Walsh.

*Strictly Limited to 12 Participants
Approved for 14 NZDA CPD points*

Dr Hisham Abdalla

Dr Hisham is the first multiple laser dentist in New Zealand and one of the first in Australasia to teach and evolve this technology to enhance dentistry. He is an international speaker, author and educator in the fields of Laser dentistry, Minimally Invasive, high-tech and CEREC CAD/CAM dentistry. He is an invited Associate Professor at the University of Cagliari in Italy. He is the NZ course provider and examiner for The Queensland University Laser Certification program, by Professor L. Walsh.

Hisham is known for his pioneering ideas, strong motivation and passion for research. His colleagues at the Auckland Dental Association nominated him for NZDA Young Dentist of the Year in 2005. In 2006 he represented NZ as the finalist at the Royal Australasian College of Dental Surgeons Young Lecturer of the Year Award. He is a Fellow & Diplomate of the World Congress of Minimally Invasive Dentistry. He served as a Directors board member of the organization in the USA. He is a Founding member of the NZ Academy of Cosmetic Dentistry, Founding member and past Vice President of the NZ Institute of Minimal Intervention Dentistry, Fellow of the World Clinical Laser Institute, member of the Auckland and NZ dental associations. Dr Hisham practices dentistry and runs courses for dentists and hygienists from all over the world. He graduated with honors from Charles University in Prague.

Learning Outcomes

- Why lasers? Why now?
- The advantages of lasers in medicine and dentistry
- Laser physics
- Differences between lasers
- What can lasers do and why
- What can't laser do and why
- Laser safety protocols
- Sterilisation and maintenance of the machines
- Clinical applications
- How will lasers help with my procedures
(Restorative, Surgical, Periodontal, Cosmetic, Endodontic & more)
- Marketing your lasers. Return on Investment
- Avenues for advancing your laser learning experience
