## Medical Aesthetics Congress

201

Combining Aesthetic Science & Artistry

Cebu, Philippines 19th and 20th March

Dear Doctor,

With great pleasure I invite you to Asia Pacific Medical Aesthetics congress-2011 at Cebu, Philippines on 19th and 20th March, 2011.

We have invited leading dermatologists and plastic surgeons from Asia Pacific, Europe and the United States with expertise in surgery, injectables, and laser therapy. This Asia Pacific Medical Aesthetics Congress focuses on giving each of you a chance to learn and share best practices, combining practical experience, science with aesthetic artistry. You will be invited to select lectures, workshops and demonstrations with parallel sessions being offered to allow for both small group experiences as well as larger workshops and panel discussions.

This meeting aims to provide a unique opportunity for leading practitioners from Asia Pacific to demonstrate their skill in facial assessment, explore latest treatment techniques in medical aesthetics and share ideas about running a successful aesthetics practice.

Through our interactive program, comprising plenary sessions, podium presentations, live injection demonstrations, and hands on workshops, there will be optimal opportunity for scientific exchange, and experience sharing and networking with international as well as region's leading practitioners.

I am sure you will find this meeting interesting, insightful and relevant to your clinical practice. I look forward to see you in person.

Yours sincerely,

Famy, MD

Dr. John D Rogers

Medical Director, Allergan Asia-Pacific
