

# Avenues to Advance Your Laser Training

## Course Description

This course will provide the dental professional with the understanding of the science, safety and types of lasers as well as their main functions in dentistry today. This full day workshop will focus on the clinical applications of the Diode laser, as an integral part of every day modern dental practice. Clearly emphasizing the advantages to the patient, clinician and the dental team. Whether you are new to lasers or a current laser user, you are guaranteed to benefit from this training. Back from presenting his latest laser clinical work in the USA, Europe, Dubai and Australia, Dr Hisham is excited to engage with his New Zealand colleagues again.

## Course Objectives

- Understanding laser types and functions
- Understanding the advantages and impact of a diode laser on your practice
- Mastering diode laser techniques through hands-on practice
